Our Ref: CG 64

Dear Ms Nichols,

**SUPPLY AND INSTALLATION OF 1 MUGA AT NORTHLEACH**

Thank you for your enquiry and for the opportunity to submit our proposal for the above project.

I have pleasure in submitting our quotation for the schemes above together with a graphical representation of the proposed, multi-use games areas. Supporting safety and technical information, editorial and written references are also enclosed for your information. On request, we would be pleased to provide additional references from some of our other long standing clients who can also vouch for the quality, durability, and longevity of our products, whom include RAF Digby, RAF Cosford, RAF Marham, UK local authorities and parish councils.

Lightmain multi-use games areas and shelters are top of the range for quality. Hot dipped galvanized, powder coated and complying to PAS 30; our steelwork carries a fair wear and tear warranty of 25 years and a paint finish guarantee of 5 years. The products have been specifically designed to ensure that the safety of young people remains paramount, to this end, the modular panels are constructed to eradicate finger and head traps, whilst the supporting steel frame work ensures rigidity and minimizes resonance and noise. The multi-use games area will be provided in any RAL colour of your choice

Our normal lead times to starting work on site are approximately 3 weeks from receipt of your order.

Should you have any queries, please do not hesitate to contact me.

Finally, Lightmain remain cogniscant that our work brings us into contact with young people and vulnerable adults, thus all of our staff have been List 99 and CRB checked.

Yours Sincerely,

Colin Gordon  
Sales & Contracts Manager

The specification directed at our meeting requested the MUGA in 3m high fencing, with an overall dimension of 30m x 15m. The design includes 3 x integral floodlights along one side as requested. I have also quoted for a connecting roadway at the Westwards Centre, to link the existing car park with the old tennis courts, to create a pin kerb edged and re-surfaced 33m x 33m additional car park. The quotation does assume that access to electricity for the flood lighting will be relatively easy; however, should there be a requirement to provide extensive cabling, this price may vary.

At our meeting in July, I also looked closely at another site, close to the existing King George V playing fields and tennis courts in the village centre. The site will require very significant leveling and drainage to allow for the installation of a 30m x 15m MUGA, in addition, there appears to be an additional access issue for electricity cabling, which will incur further expense. It is my opinion that this is the less favourable of the two sites discussed and will require up to an additional £20,000.00 of funding to ensure a satisfactory installation.

Value for money (VFM) is much debated and Lightmain are cognisant that all organizations are now concerned with achieving VFM. We at Lightmain consider our MUGAs and services to be the leading product in the UK when considering fitness for purpose, cost of the product, reliability, product guarantee, installation and after sales service. To this end, Lightmain provide real VFM.

All prices quoted are exclusive of VAT at 17.5%. The summary of costings as per your original request are:

Ser	Option	Cost	Comments
1	30m x 15m x 3m with Matchwinner synthetic grass surface and integral floodlights to include new access road and resurfaced car park at the Westward Centre	£115,545.00	Recommended course of action
2	30m x 15m x 3m with tarmac surface and integral floodlights to include new access road and resurfaced car park at the Westward Centre	£104,765.00	
3	30m x 15m x 3m with integral floodlights to include levelled surface at King George V playing fields	£135,545.00	

### NORTHLEACH 30M X15M X 3M MUGA WITH INTEGRAL FLOODLIGHTS
